Subject: Whetstone Tariff Fees

Good morning,

I would like to voice my opinion regarding the tariff fees that are proposed by Algonquin Water for the Whetstone area.

First, I adamantly oppose the drilling of deep wells within the area to feed the proposed developments, in order to "line" some greedy individuals, or corporations pockets, who live elsewhere and have no real interest in the area except the making of money. At this point, I suppose that there cannot be anything done about the deep wells that are going to be drilled or put into service, but it terrible how the aquifer will be lowered due to the new subdivisions. What are we going to do when the water totally runs out? Have you not read about the area (once a fertile area) in Australia that had the aquifer depleted? What used to be farms and ranches are now dust bowls.

Anyway, I oppose the tariff that is being proposed by Algonquin water, should my private well dry up, and I am forced to connect to the water system, and hope that you will take my opposition, as well as may others that you should be hearing from, in determining your actions.

Thank you for your time in reviewing my opinion.

Cordially,

Roy Bever
